

THE **SECRET** BEHIND

- ✓ 30% faster cut
- ✓ 50% longer lasting
- ✓ Better results

BONA CERAMIC **GREEN ABRASIVE** 8600

Unique composite for better sanding

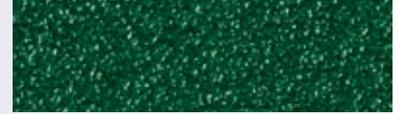

SANDING

EVEN SANDING

The more even a grit surface is on the abrasive, the easier it is to achieve a smoother surface. Bona Abrasives displays a significantly more even grit structure.

GRIT DISTRIBUTION

With a uniform distribution of grit, sanding results are smoother and more even. Bona Abrasives display a significantly more uniform grit distribution.

The **Secret** Behind

Bona Ceramic Green Abrasive 8600

Bona Ceramic Green Abrasive 8600 are long-lasting and tough in action, yet gentle to the wood with very low fibre ripping. The unique mixture of ceramic and aluminium oxide enables impressive performance.

It provides 30% faster abrasion and is 50% more long-lasting than previous standard abrasives. With the introduction of the new Bona Ceramic Green Abrasive 8600, a faster, smoother and safer sanding process will be your new standard.
